## Hardware Installation

---

1. Power off all devices, including the source YPbPr device and display.
2. Connect the source device's component video output (such as DVD player) to the converter's input.
3. Connect the source device's L/R audio output to converter's input.
4. Connect an HDMI cable (not included) to the TV's HDMI input and connect the other end to the converter's HDMI output.
5. Plug the power adapter into the power jack, then plug it into a reliable power source.
6. Power on all audio/video units connected to the converter.
7. The converter is ready for use.
